PROFILE

Final-year CS student (PESCE Mandya, 2026) with hands-on experience building and deploying full-stack systems, APIs, and production-grade backends. Experienced across the full stack — from backend architecture to React UIs — with a focus on clean, deployable systems.

SKILLS

Frontend: React, Vite, Tailwind CSS, Recharts, Vanilla JS

Backend: Node.js, Express, MongoDB, JWT, REST APIs, Python

Databases: MongoDB (Mongoose, CRUD, Schema Design), SQL (Basic Queries)

Languages: JavaScript, Java, Python

PROJECTS

Multi-Tenant SaaS Subscription Platform | *Java Spring Boot · PostgreSQL · AWS EC2/RDS · Docker* [Live](#)

- Built a production-grade multi-tenant SaaS backend from scratch using Spring Boot 3.5, Spring Security 6, and PostgreSQL 15 — starting from a full BRD and TDD before writing a single line of code.
- Implemented row-level multi-tenancy (every table with `tenant_id`), JWT stateless auth (access + refresh tokens), and RBAC with three roles (OWNER / ADMIN / MEMBER).
- Enforced subscription plan gating server-side (Free / Pro / Enterprise) — Free plan capped at 3 projects; logic lives in the service layer.
- Deployed live on AWS EC2 with RDS PostgreSQL; Flyway versioned migrations for zero manual DDL. Swagger UI exposed at the public API base URL.

CollegeERP | *MERN Stack · JWT · RBAC* [Live](#)

- Team-built ERP system with JWT authentication, role-based access control (admin/faculty/student), 12+ modules, and 15+ REST API endpoints.
- Architected the backend data models and API layer; handled auth middleware and session management.

Decentralized Voting System | *Solidity · Python FastAPI · Web3.js · MetaMask* [Live](#)

- Built end-to-end on-chain voting with Solidity smart contracts, FastAPI backend, and MetaMask wallet integration for voter authentication.

Smart Electronic Stick (IoT) | *Arduino · GSM · GPS · Zigbee · Ultrasonic* In Progress

- Led hardware integration for a visually impaired assistance device with fall detection, obstacle sensing, location tracking, and SMS alerts over GSM.
- Resolved SoftwareSerial conflicts, AT command timing issues, and multi-sensor data fusion across Arduino Uno and Nano boards.

EXPERIENCE

Co-Secretary 2023 – 2026

YRCW PESCE Mandya, Karnataka

- Coordinated events, managed volunteer teams, and represented the chapter at inter-college programs.

EDUCATION

PES College of Engineering, Mandya 2022 – 2026

B.E. Computer Science & Engineering (VTU) Mandya, Karnataka

Cauvery Excel PU College 2020 – 2022

PUC (Pre-University) Mandya, Karnataka

ACHIEVEMENTS & CERTIFICATIONS

- 1st Runner-Up, **Fin-A-Thon Hackathon** — fintech product built and demoed under time constraint.
- Best Student Award** — ISTE PESCE chapter recognition for leadership and technical contribution.
