## SUMMARY

Frontend developer with hands-on experience building modular, reusable UI components in vanilla JavaScript and React, integrating RESTful APIs with structured JSON parsing and error handling, and delivering responsive, semantically correct interfaces. Familiar with secure coding practices, Git-based collaborative workflows, and cross-functional team environments. Eager to contribute to production-grade FinTech interfaces at Zorvyn.

## TECHNICAL SKILLS

**Frontend:** Vanilla JavaScript (ES6+), Semantic HTML, CSS3, DOM Manipulation, Browser APIs, React, Tailwind CSS, Responsive Design, Event Delegation, Client-side State Management

**Backend & APIs:** Node.js, Express.js, REST APIs, JWT Authentication, JSON Parsing & Error Handling

**Databases:** MongoDB, SQL

**Dev Workflow:** Git, GitHub, Branching, Code Reviews, Merge Requests, Debugging, VS Code, Postman

**Core CS:** Data Structures, OOP, SDLC, Secure Coding Fundamentals (OWASP), Linux

## PROJECTS

### LostFinder *HTML · CSS · Vanilla JavaScript*

[LostFinder](#)

- Built modular, reusable UI components entirely in vanilla JavaScript using DOM APIs and event delegation — no frameworks or libraries.
- Implemented client-side state management to track item listings, form submissions, and filter states without page reloads.
- Applied semantic HTML structure and ARIA attributes for accessible, standards-compliant markup throughout the application.
- Integrated client-side JSON data handling with structured error states and responsive feedback for user interactions.
- Delivered a fully responsive layout using CSS Grid and Flexbox, optimised for mobile and desktop devices.
- Practiced clean code structuring, component separation, and browser-based debugging using DevTools.

### College ERP System *React · Node.js · Express · MongoDB*

[CollegeERP](#)

- Developed role-aware frontend views in React with dynamic UI rendering based on JWT claims, consuming REST APIs with structured JSON parsing and typed error state handling.
- Built reusable form components and dashboard modules supporting three distinct user roles — students, faculty, and administrators.
- Designed and integrated secure RESTful APIs with JWT authentication and role-based access control, ensuring frontend-backend data contract consistency.
- Managed version-controlled collaborative development using Git — feature branches, pull requests, and iterative code reviews across a team.
- Optimised MongoDB queries and structured backend service layers to improve data retrieval performance for frontend consumers.

## CERTIFICATIONS

Postman API Fundamentals Student Expert

Postman, 2025

Web Development with React

DLithe

Java Concepts and Object-Oriented Programming

Infosys Springboard

Generative AI for Data Analytics

Forage, 2025

## EDUCATION

B.E. in Computer Science and Engineering

2022 – Present

P.E.S. College of Engineering, Mandya, Karnataka

## LEADERSHIP & ACHIEVEMENTS

- Awarded Best Student – ISTE for academic and leadership excellence.
- Coordinated cross-functional student teams for college-wide events with 200+ participants.

- Led academic project teams — structured development tasks, Git workflows, and ensured on-time delivery.
- 1st Runner-Up, Fin-A-Thon Hackathon — Puttannaiah Foundation.
- Co-Secretary, YRCW PESCE; Member & Organiser, ISTE PESCE.
